Mr. David M. Shaw
President
Global Uni-Docs Corporation
Post Office Box 7123
Dallas, TX 75209-0123

Dear Mr. Shaw,

This letter is to confirm that Telcordia Technologies Inc. will provide support on the GUD Phase I SBIR proposals in response to "AF073-077, Enhancing Trust via End-node Security in SensorWeb Decision Support Systems". We believe that your proposals describe a sound technical approach to provide an innovative solution to the challenges in SensorWeb decision support system. We also think that the result of this work could be of significant interest to the Air Force and the commercial network security community.

Telcordia is very well positioned to assist with Phase I as well as subsequent development and commercialization that would take place in Phase II. We have carried out significant work for Government and Commercial customers in the areas of network security and information assurance. Our Applied Research group has extensive experience in developing end-node security technologies

Given the limited budget in Phase I, our total work efforts will not exceed \$15,000.

We look forward to working with Global Uni-Docs Corporation on this effort.

Sincerely,

A handwritten signature in cursive script that reads "Joseph DesMarais".

Joseph DesMarais
