Mr. David M. Shaw
President
Global Uni-Docs Corporation
Post Office Box 7123
Dallas, TX 75209-0123

Dear Mr. Shaw,

This letter is to confirm that Telcordia Technologies Inc. will provide support on the GUD Phase I proposal in response to DHS SBIR H-SB07.2-005 Secure and Reliable Wireless Communication for Control Systems. We believe that your proposal, "Secure Wireless Communication for Control Systems Using Embedded Technology" describes a sound technical approach for assuring the authenticity of transmitted data and physical identity of remote sensors. We also think that the results of this work could be of significant interest to the commercial telecom community as well as to the Army and DOD.

Telcordia is very well positioned to assist with Phase I as well as subsequent development and commercialization that would take place in Phase II. We have carried out significant work for Government and Commercial customers in the areas of wireless security and information assurance. Our Applied Research group has extensive experience in developing technologies to detect and thwart a variety of potential attacks in wireless communication systems, including man-in-the-middle attacks.

Given the limited budget in Phase I, our total work effort will not exceed \$15,000.

We look forward to working with Global Uni-Docs Corporation on this effort.

Sincerely,

A handwritten signature in blue ink that reads "Joseph DesMarais".

Joseph DesMarais
Executive Director
AR Federal Programs
